Call for Papers for Special Session

OPERATIONAL RESEARCH IN AGEING STUDIES AND SOCIAL INNOVATIONS

at the 16th International Symposium on Operations Research in Slovenia (SOR '21)
which will be held in Bled, Slovenia, September 22 – 24, 2021.

Chaired by: Prof. Marija Bogataj, Assoc. Prof. David Bogataj and Assist. Prof. Samo Drobne

With their ageing populations, European member states are under increasing pressure to provide optimal long-term care (LTC) to their citizens and to manage and control their chronic health conditions. However, research in LTC transition policy and management, and utilisation and risk reduction modelling is still in its infancy. In this section, we will present the development of OR, control theory, demographic and actuarial models to support LTC decisions, the short supply chain for providing goods and services to older adults, and optimal strategies for developing social infrastructure. The aim is also to contribute to social innovations for servicing older adults.

By popularising models that support decisions at the national, regional and local levels, the OR society can contribute significantly to a better life in old age for Europeans. We therefore encourage submissions that incorporate different OR and control approaches, including statistical models to support decisions in ageing studies and policies.

DEADLINES:

- Submission of contributed papers: June 3, 2021
- Referee's reports: July 1, 2021
- Submission of revised papers and copies of bank transfer: August 25, 2021

Note: When submitting the paper, please, select "Special Session: OR in Ageing Studies and Social Innovations".
