Call for manuscripts for a Special Issue

Guest Editors: **Janez Povh, Lidija Zadnik Stirn, Janez Žerovnik**

(contact email: janez.zerovnik@fs.uni-lj.si)

Deadline for submission: ~~February 15, 2024~~ **April 15th 2024, EXTENDED !!**

At the occasion of the 17th International Symposium on Operations Research in Slovenia (**SOR'23**), September 20-22, 2023, Bled, Slovenia (<https://sor.fov.um.si/>), the journal **Central European Journal of Operations Research (CEJOR)** invites submission of papers to the special issue. Although the call is primarily asking for journal versions of contributions of registered participants of SOR'21, other high-quality submissions on any OR topic are welcome.

SOR' is the premiere scientific event in the area of operations research, one of the traditional series of the biannual international conferences organized by the Slovenian Society Informatika, Section of Operations Research. It represents a continuity of symposia, which have attracted a growing international audience since the first symposium. SOR provides an international forum for scientific exchange at the frontiers of operations research (OR) in mathematics, statistics, economics, engineering, education, environment, computer science etc. Since OR comprises a large variety of mathematical, statistical and informational theories and methods to analyse complex situations and to contribute to responsible decision making, planning and the efficient use of the resources, we believe that in the world of increasing complexity and scarce natural resources there will be a growing need for such approaches in many fields of our society.

With another special issue of CEJOR, we aim to both provide an overview of the research reported at the conference SOR'21 and to encourage and support the international collaboration in Central Europe and beyond.

CEJOR is an official journal of the Austrian, Croatian, Czech, Hungarian, Slovakian, and Slovenian OR societies. The journal offers high quality papers that cover the theory and practice of OR and the relationship of OR methods to modern quantitative economics and business administration. Each issue expands our understanding of managerial problems in complex systems and supports the decision-making process. This journal features theoretical papers as well as application-oriented contributions and practical case studies. The submitted papers must be original and must not have been previously published or be currently under consideration for publication elsewhere.

The Central European Journal of Operations Research is abstracted and indexed in the following databases: ABS Academic Journal Quality Guide, Academic OneFile, Business Source, Current Abstracts, Digital Mathematics Registry, E-JEL, EconLit, Google Scholar, International Abstracts in Operations Research, Journal Citation Reports/Science Edition, Mathematical Reviews, OCLC, Research Papers in Economics (RePEc), Science Citation Index Expanded (SciSearch), SCOPUS, Summon by Serial Solutions, TOC Premier, VINITI - Russian Academy of Science, Zentralblatt Math.

Submission Details: The format of manuscripts for CEJOR as well as guidelines and templates can be found on the webpage of Springer-Verlag <https://www.editorialmanager.com/cjor/>. When submitting the paper, please select the article type "**S.I.: SOR-SympSlov**".

All papers submitted for publication will be refereed according to the high standards of the journal.
